

Indoor air quality products and training for housing professionals

Which courses are best for you?

Here's a short questionnaire to help you decide which courses in the IAQ and Housing Durability series are best for you.

<i>Part 1</i>		
Do your clients ask you to respond to their indoor air quality (IAQ) and housing durability concerns?	YES	NO
Would you like to refresh or increase your skills and knowledge about:		
• basic IAQ assessment tools?	YES	NO
• building science principles?	YES	NO
• common outside building problems and solutions?	YES	NO
• common inside building problems and solutions?	YES	NO
• common mechanical problems and solutions?	YES	NO
• common influences of occupants on IAQ and solutions?	YES	NO
• common IAQ and housing durability themes in model North American housing programs?	YES	NO
If you answered "yes" to more than 1 question, select <i>Resolving IAQ and Housing Durability Concerns: The Essentials</i> . By taking this course, you can increase your skills in recognizing causes and developing solutions to your client's concerns. This can provide additional quality and value for your clients.		

<i>Part 2</i>		
Would you like to increase your knowledge about:		
• effectively responding to clients who have IAQ or housing durability concerns?	YES	NO
• basic safety and investigative tools and measurements (e.g., carbon monoxide, temperature, relative humidity, surface moisture, extent of mold)?	YES	NO
• supplementary investigation and measurement techniques (e.g., mold sampling, psychrometrics, chemical sampling, thermography)?	YES	NO
• in conducting a methodical on-site investigation using a simple, efficient protocol?	YES	NO
Would it be helpful to use an efficient method to investigate:		
• the occupant's perspective of the problem?	YES	NO
• the property?	YES	NO
• the building exterior for significant symptoms and causes?	YES	NO
• heating, ventilation, and filtration systems?	YES	NO
• moisture problems in bathrooms and kitchens?	YES	NO
• other rooms?	YES	NO
• attics to assess moisture, mold, ventilation, airtightness and insulation?	YES	NO
Would it be helpful to develop a prioritized action list for your client		

Indoor air quality products and training for housing professionals

using a quick, efficient, standardized suggestion checklist form?	YES	NO
Would you like to leave the course with duplicable forms that you can immediately use in your work?	YES	NO
If you answered "yes" to more than 1 question, select <i>Investigating IAQ and Housing Durability Concerns: An Efficient Method</i> . By taking this course, you can increase your ability in investigating causes and developing solutions efficiently to respond to your client's concerns. The effective, time efficient forms and checklists can easily be added to your current tool kit, providing additional value to what you already provide to clients.		

<i>Part 3</i>		
Do your clients ask you to respond to mold concerns that are affecting indoor air quality (IAQ) and housing durability?	YES	NO
Would you like to increase your knowledge about: <ul style="list-style-type: none"> • how mold affects people and housing durability? • typical causes? • associated risk factors? • current guidelines and how they differ? • supplementary investigative and measurement techniques (e.g., mold sampling, moisture mapping, infrared thermography)? 	YES	NO
Would you like to increase your skills and knowledge about: <ul style="list-style-type: none"> • inspecting and categorizing the extent of mold? • when to use specific investigative and measurement techniques? • developing a written workplan? • communicating with stakeholders? • protecting yourself and occupants through all phases of assessment and clean-up? • equipment needed to clean-up mold? • making decisions in managing contents? • containing the work area? • demolition, transport and disposal of moldy materials? • cleaning mold contaminated and non-visibly contaminated areas? • renovating to prevent mold growth recurrence? • preparing the site for re-occupancy? • monitoring the effectiveness of a clean-up? 	YES	NO
Would you like to have a comprehensive kit of resources related to mold assessment and clean-up, including questionnaires, workplan sheets, checklists, sample letters and references to use after the course?	YES	NO
If you answered "yes" to more than 1 question, select <i>Mold Assessment and Clean-Up: Residential, The Essentials</i> . By taking this course, you can increase your knowledge and decision-making skills in assessing and cleaning up mold. This can provide additional quality and value for your clients.
